

DESTILLO D 12 - D 100

Mixed-bed water demin cartridges

Mixed-bed water demin cartridge in stainless steel design, pressure-resistant up to 10 bar. With permanently regenerable quality resin. Water distribution system in stainless steel for water flow from top to bottom. Due to optimized design of internals up to 30 % more water flow than conventional cartridges of other suppliers (with the same pressure drop).

BENEFITS

- No wastewater discharge
- Easy installation and fast cartridge replacement
- Delivery of complete units incl. conductivity meter, open-end wrench and connection hoses
- Up to 30 % higher flow compared to conventional cartridges (with the same pressure drop)

APPLICATIONS

- Production of pure water for laboratories, clinics, battery, heating or cooling systems
- Use as polisher downstream of RO and EDI units
