EKP Cleaning and descaling pumps

The descaling pump is used for safe and efficient cleaning of water-carrying pipes and vessels such as heat exchangers, heating and cooling systems, flow heaters, boilers and water storage tanks. The EKP series is equipped with a multi-port control valve and has been tried and tested in practical use for many years. The ready-to connect unit is delivered with 2 \times 2 m fabric hose with hose nozzle and with union nut.

BENEFITS

- Robust industrial quality with a long service life
- Easy, clean, and safe filling thanks to large opening with screw cap
- Safe operation due to premixing of chemicals and water with multi-port control valve
- High precision control of flow rate and direction with multi-port control valve
- Easy transport due to equipment with wheels (unit size 90)

APPLICATIONS

For descaling of

- Piping systems
- Heat exchangers
- Heating and cooling systems
- Circulating water heaters and boilers
- Hot and cold water storage tanks

EKP 45-W / II

EKP Cleaning and descaling pumps

CONDITIONS OF USE

The resistance of the materials to the chemicals used must be tested before use.

TECHNICAL DATA OF SERIES

Maximum flow rate	50 l/min
Maximum head	6 m
Material Pump	PP
Material seals	FKM
Protection class	IP 55
Rotation speed	2,800 U/min
Operating temperature	0 – 50 °C

Product name	Mains connection	Hydraulic connection	Dimensions in mm	Tank capacity	Item number
	kW / V / Hz		W x D x H	I.	
EKP 45-W/II	0.37 / 230 / 50	R 3/4"	460 × 710 × 580	50	392 002
EKP 90-W/II	0.37 / 230 / 50	R 3/4"	460 x 710 x 780	100	392 005
